

"When setting up our business, we were looking for suppliers who could offer their expertise and guidance to IDS in numerous different fields. When it came to Blackberry and mobile solutions, we decided to go with Pioneer, and I'm delighted to say it has proven to be the correct decision. Whenever we have needed support or advice, the team at Pioneer have been available and nothing has been too much trouble. We have the kind of relationship with Pioneer, that mirrors what we are looking to achieve with our clients"

Jonathan Jerome
Intelligent Data Systems

"I just thought I'd drop you a quick line to let you know that following all your instructions yesterday, I have successfully got all my data transferred across to my new BB and it is all working brilliantly. Thanks so much for the advice"
